SUBJECT INDEX

General

Manageable multidimensional inverse scattering theory, R.H.T. Bates, V.A. Smith and R.D. Murch 201 (1991) 185
Novel methods for spectral analysis, R. Roy, B.G. Sumpter, G.A. Pfeffer, S.K. Gray and D.W. Noid 205 (1991) 109
The arguments against "antigravity" and the gravitational acceleration of antimatter, M.M. Nieto and T. Goldman 205 (1991) 221
Theorems on the uniqueness and thermal properties of stationary, nonsingular, quasifree states on spacetimes with a bifurcate Killing horizon, B.S. Kay and R.M. Wald 207 (1991) 49
Parallel architectures and applications. Proceedings of the 3rd Graduate Summer Course on Computational Physics, Crêt-Bérard, Puidoux, Switzerland, 3–7 September 1990, K.M. Decker, ed. 207 (1991) 137
The Kramers problem: fifty years of development, V.I. Mel'nikov 209 (1991) 1
The calculation of non-adiabatic Berry phases, D.J. Moore 210 (1991) 1
Ensemble interpretations of quantum mechanics. A modern perspective, D. Home, M.A.B. Whitaker 210 (1992) 223

The physics of elementary particles and fields

Big-bang nucleosynthesis and the quark–hadron phase transition, H. Reeves 201 (1991) 335
Summary of experiments with the Neutral Detector at the e^+e^- storage ring VEPP-2M, S.I. Dolinsky, V.P. Druzhinin, M.S. Dubrovin, V.B. Golubev, V.N. Ivanchenko, E.V. Pakhtusova, A.N. Peryshkin, S.I. Serednyakov, Yu.M. Shatunov, V.A. Sidorov and A.N. Skrinsky 202 (1991) 99
Theoretical unitarity bounds, theorems and scalings for the strong interactions at high energies, P. Valin 203 (1991) 233
First results at the LEP e^+e^- collider, J. Steinberger 203 (1991) 345
Dynamical symmetry breaking in four-fermion interaction models, B. Rosenstein, B.J. Warr and S.H. Park 205 (1991) 59
Dual QCD: a review, M. Baker, J.S. Ball and F. Zachariasen 209 (1991) 73
Topological field theory, D. Birmingham, M. Blau, M. Rakowski, G. Thompson 209 (1991) 129
Anomalies in gauge theories, M.A. Shifman 209 (1991) 341

Nuclear physics

A global nucleon optical model potential, R.L. Varner, W.J. Thompson, T.L. McAbee, E.J. Ludwig and T.B. Clegg 201 (1991) 57
Microscopic theory of the total reaction cross section and application to stable and exotic nuclei, M.S. Hussein, R.A. Rego and C.A. Bertulani 201 (1991) 279
The Feshbach–Kerman–Koonin multistep compound reaction theory, R. Bonetti, M.B. Chadwick, P.E. Hodgson, B.V. Carlson and M.S. Hussein 202 (1991) 171

"Quantum" molecular dynamics—a dynamical microscopic n-body approach to investigate fragment formation and the nuclear equation of state in heavy ion collisions, J. Aichelin 202 (1991) 233
Time-dependent methods in scattering theory, H. Kröger 210 (1992) 45

Atomic and molecular physics

Chaotic ionization of highly excited hydrogen atoms: comparison of classical and quantum theory with experiment, R.V. Jensen, S.M. Susskind and M.M. Sanders 201 (1991) 1
The semiclassical close-coupling description of atomic collisions: recent developments and results, W. Fritsch and C.D. Lin 202 (1991) 1
Methods and programs in collisions of positrons with atoms and molecules, E.A.G. Armour and J.W. Humberston 204 (1991) 165
Quantum Monte Carlo studies of vibrational states in molecules and clusters, M.A. Suhm and R.O. Watts 204 (1991) 293
Above-threshold ionization, J.H. Eberly, J. Javanainen and K. Rzążewski 204 (1991) 331
Recoil ions, C.L. Cocke and R.E. Olsen 205 (1991) 153
The calculation of photoionisation cross sections of simple polyatomic molecules by L^2 methods, I. Cacelli, V. Carravetta, A. Rizzo and R. Moccia 205 (1991) 283
Theory of resonance and threshold effects in electron–molecule collisions: the projection operator approach, W. Domcke 208 (1991) 97
Are squeezed states necessary? A case study of photon detection based on quantum interference, J. Grochmalicki, M. Lewenstein 208 (1991) 189
Time-dependent methods in scattering theory, H. Kröger 210 (1992) 45
Nonlinear susceptibilities and light scattering on free atoms, A.G. Fainshtein, N.L. Manakov, V.D. Ovsiannikov, L.P. Rapoport 210 (1992) 111
Resonant collisional energy transfer between Rydberg atoms, T.F. Gallagher 210 (1992) 319

Classical areas of phenomenology (including applications)

Theory of the Rayleigh–Taylor instability, H.J. Kull 206 (1991) 197
Scale invariant theory of fully developed hydrodynamic turbulence—Hamiltonian approach, V.S. L'vov 207 (1991) 1

Fluids, plasmas and electric discharges

Pellet–plasma interactions in tokamaks, C.T. Chang 206 (1991) 143

Condensed matter: structure, thermal and mechanical properties

Emission channeling and blocking, H. Hofsäss and G. Lindner 201 (1991) 121
Dynamic chaos in the motion of charged particles through a crystal, A.I. Akhiezer, V.I. Truten' and N.F. Shul'ga 203 (1991) 289
Propagation of X-rays in distorted crystals under dynamical diffraction, J. Gronkowski 206 (1991) 1
Density functional theory of freezing and properties of the ordered phase, Y. Singh 207 (1991) 351
Phase transitions and heterophase fluctuations, V.I. Yukalov 208 (1991) 395

Condensed matter: electronic structure, electrical, magnetic and optical properties

Some aspects of the theory of spin glasses and disordered ferromagnets, I.A. Akhiezer and D.P. Belozorov 204 (1991) 253
Transient gratings, four-wave mixing and polariton effects in nonlinear optics, J. Knoester and S. Mukamel 205 (1991) 1
Optical dephasing and homogeneous optical bands in crystals and amorphous solids: dynamic and stochastic approaches, I.S. Osad'ko 206 (1991) 43
Metal cluster compounds and universal features of the hopping conductivity of solids, M.P.J. van Staveren, H.B. Brom and L.J. de Jongh 208 (1991) 1
The Kramers problem: fifty years of development, V.I. Mel'nikov 209 (1991) 1

Cross-disciplinary physics and related areas of science and technology

Auditory physics. Physical principles in hearing theory. III, E. de Boer 203 (1991) 125
Physics and social science – the approach of synergetics, W. Weidlich 204 (1991) 1

Geophysics, astronomy and astrophysics

Big-bang nucleosynthesis and the quark-hadron phase transition, H. Reeves 201 (1991) 335
Formation and evolution of binary and millisecond radio pulsars, D. Bhattacharya and E.P.J. van den Heuvel 203 (1991) 1
Supernova rates: a progress report, S. Van den Bergh 204 (1991) 385
The theory of supernova shocks: an analytical approach, P.M. Pizzochero 206 (1991) 99
The physics of gamma-ray bursts, A.K. Harding 206 (1991) 327
The r-process and nuclear chronology, J.J. Cowan, F.-K. Thielemann, J.W. Truran 208 (1991) 267
Diagnostics of stellar evolution: the oxygen isotopes, D.S.P. Dearborn 210 (1992) 367
